## WORK EXPERIENCE

---

### Backstage

#### Project Area Maintainer

May 2023 – Present

- Created a new Backstage open source project area for OpenAPI tooling. Aligned with core maintainers and stakeholders on a schema-first development experience in the project.
- Defined a new project area roadmap with 13 major milestones; delivered on 7 of those milestones within 6 months of becoming a maintainer.
- Completed multiple surveys of the open source ecosystem to find best-fit tools in SDK generation, schema request validation and API fuzzing.

### Spotify

#### Full Stack Engineer • New York, NY

Sep 2023 – Dec 2023

- Worked with a team of 6 engineers to deliver a new marketing website experience with over 15 new products using NextJS. Validated pages with marketing and design to ensure accessibility, SEO, and design standards were met.
- Led the response for a security incident. Worked with legal and security to determine blast radius and as a result, added additional audit logging for improved security posture in the gRPC backend.
- Led design for a decentralized marketplace publishing platform that would span both Backstage open source and internal backends. The proposed architecture would have used Github actions, gRPC, and Typescript.

### Amazon Advertising

#### Software Engineer • New York, NY

Aug 2023 – Sep 2023

- Worked with a core team of 3 engineers to deliver a new financial automation system for advertising data using Java, AWS SQS and AWS Lambda. Navigated multiple dependencies with partner teams and delivered on schedule.
- Led an internal effort to integrate Backstage for the DAVADA organization using Neo4J, Typescript and AWS ECS. Met weekly with senior engineers and managers to scope requirements and get feedback.

## EDUCATION

---

### Bachelor of Science – BS in Computer Science

University of Arizona

Aug 2018 – May 2022

Double degree in Computer Science (BS) and Russian Language (BA) with a minor in Chemistry.
